DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-14, 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fulton et al. in view of Yankner et al. (US Pat. 6,080,778).

Fulton et al. disclose that Galanthamine is effective for treatment of Alzheimer's disease (See entire document).

Yankner et al. disclose the administration of statins for treatment of Alzheimer's disease (Column 3, lines 20-53).

The prior art discloses the treatment of Alzheimer's disease with Galanthamine. The difference between the prior art and the claimed invention is that the prior art does not expressly disclose the combination of Galanthamine and statins for treatment of Alzheimer's disease. However, the prior art amply suggests the same as the prior art disclose that both are effective for treatment of Alzheimer's disease. As such, one of ordinary skill in the art would have been motivated to combine the prior art with the expectation that the combination would be effective for treatment of Alzheimer's disease. Further, one of ordinary skill would have been motivated to use various amounts, including the amounts claimed, depending on the effectiveness of the treatment of Alzheimer's disease.

Art Unit: 1616

Therefore, the claimed invention, as a whole, would have been *prima facie* obvious to one of ordinary skill in the art at the time the invention was made, because every element of the invention has been collectively taught by the combined teachings of the references.
